

SAI DEEPAK S

Game Developer

Contact - +91 7975011898

Email – deeedev22@gmail.com
[LinkedIn](#) [GitHub](#) Portfolio

Skills

- Programming Languages : C++(Advanced), C#(Advanced)
 - Game Engine : Unity(Advanced)
 - Version Control : Git
 - Design Patterns : Model View Controller(MVC), Service Locator, Dependency Injection Singleton, Observer, Object pooling , Command, State Machine
 - Data Structures & Algorithms.
-

Projects

- **Monkey Shooter(C# & Unity):** ([GitHub](#)) ([Video](#))

- Architected the game using the **Service Locator** and **Dependency Injection** patterns to build modular, maintainable, and loosely coupled gameplay systems.
- Utilized **Scriptable Objects** for data-driven configuration of monkeys, projectiles, balloons, attack ranges, projectile speeds, fire rates, prices, and game balancing.
- Implemented an **Object Pooling** system for efficient projectile reuse, reducing runtime instantiation and improving performance.
- Developed a **Tilemap-based Drag-and-Drop Placement System** with placement validation for strategic monkey deployment.
- Built an **Automatic Target Detection & Projectile Combat System** supporting unique monkey behaviors, attack ranges, and projectile types.
- Designed a scalable **Wave Management System** featuring increasing enemy difficulty and specialized balloon types, including **Metal Balloons** that can only be destroyed by the Sniper Monkey.
- Implemented **Coroutine-based gameplay mechanics** for attack cooldowns, timed events, and power-up durations.
- Developed dynamic **UI systems** to display player health, currency, wave progression, and monkey selection in real time.

- **SperWomen 2D(C# & Unity):** ([GitHub](#)) ([Video](#))

- Developed a 2D side-scrolling platformer in Unity featuring player movement, jumping, crouching, coin collection, and level progression.
- Implemented **Physics 2D and collision detection** for smooth player movement, platform interactions, and gameplay mechanics.
- Designed and integrated **player animation state transitions** including Idle, Run, Jump, and Crouch using Unity's Animator Controller.
- Developed a Baby Crocodile **Patrol AI with looping patrol behavior** and walking animations to create dynamic enemy movement.
- Built a **Coin Collection System** with real-time score updates and level completion mechanics.
- **Implemented Scene Management** for seamless transitions between Lobby, Gameplay, Victory, and Game Over scenes.
- **Integrated background music and sound effects** to improve gameplay feedback and player immersion.
- Applied **Object-Oriented Programming (OOP)** principles to develop modular and reusable gameplay scripts.

- **Ball Bash (C# & Unity):** ([GitHub](#)) ([Video](#))

- Developed a 3D **wave-based survival game** in Unity where the player defends a tower by knocking enemies off the arena using physics-based combat.
- Implemented **Rigidbody physics** for player movement, enemy interactions, and realistic force-based knockback mechanics.
- Designed a **scalable Wave Management System** with progressively increasing enemy counts and difficulty after each completed wave.
- Built a **Power-Up System using Coroutines** to provide temporary strength boosts with timed activation and automatic expiration.
- Developed a **Dynamic Camera Controller** that rotates around the player based on keyboard input, improving gameplay visibility.
- Implemented Scene Management for seamless transitions between Lobby, Gameplay, and Game Over scenes.
- Integrated an **Audio Management System** featuring background music, hit effects, power-up sounds, and game-over audio.
- Applied **Object-Oriented Programming (OOP)** principles to create modular and reusable gameplay systems.

Experience

- **Full Stack Game Developer Outscal** [Jan 2026 – Present]
 - Developed C++ & SFML based clones of classic games likes Space Invaders, Duck Hunt.
 - Developed Unity & C# based games like 2D platformer, Snake2D, Endless genre.
-

Education

- **Full Stack Game Development** - Outscal [July 2024 – July 2025]
 - **Bsc.Game Design & Development** - IIFA Lancaster Degree College [July 2021 – Sept 2024]
 - **PU** – ASC INDEPENDENT PU COLLEGE [June 2019 – May 2021]
 - **High School** – Atreya Vidyaniketan [March 2019]
-
