

SAI DEEPAK S

Game Developer

Contact - +91 7975011898

Email – deeedev22@gmail.com
[LinkedIn](#) [GitHub](#) [Portfolio](#)

Skills

- Programming Languages : C++(Advanced), C#(Advanced)
 - Game Engine : Unity(Advanced)
 - Version Control : Git
 - Design Patterns : Model View Controller(MVC), Service Locator, Dependency Injection Singleton, Observer, Object pooling , Command, State Machine
 - Data Structures & Algorithms.
-

Projects

- **Monkey Shooter(C# & Unity):** [\(GitHub\)](#) [\(Video\)](#)

- **Applied Dependency Injection & Service Locator** for modular architecture.
- **Built drag-and-drop tower placement** using Tilemap & Scriptable Objects.
- **Implemented Wave System** with multiple balloon types and difficulty scaling.
- **Developed projectile combat, targeting AI, and dynamic gameplay UI.**

- **SperWomen 2D(C# & Unity):** [\(GitHub\)](#) [\(Video\)](#)

- **Developed a 2D platformer** with movement, jumping, and crouching mechanics.
- **Implemented Physics 2D, Animator Controller, and enemy patrol AI.**
- **Built collectible, level progression, and Game Over systems.**
- **Integrated audio, animations, and reusable OOP architecture.**

- **Ball Bash (C# & Unity):** ([GitHub](#)) ([Video](#))

- Developed a 3D wave-based survival game using Unity physics.
- Built enemy wave spawning and **Coroutine-based power-up system**.
- Implemented physics-driven combat, **camera controller**, and scene management.
- Integrated **audio system and modular gameplay architecture** using OOP.

- **Soccer Arena (C# & Unity):**([GitHub](#)) ([Video](#)) ([Play On Browser](#))

- Built a physics-driven **1v3 combat prototype** where the player directly controls a football using momentum-based movement and collision force.
- Implemented a **coroutine-based power-up system** granting a temporary heavy-knockback "bash" state.
- Developed **multi-enemy AI behaviour** for 3 opposing footballs with independent goal-scoring logic.
- Designed a **wave-based match** and scoring system with best-of-3 win conditions and midfield respawn logic.

Experience

- **Full Stack Game Developer Outscal**

[March 2025 – April 2026]

- Developed C++ & SFML based clones of classic games likes Space Invaders, Duck Hunt.
 - Developed Unity & C# based games like 2D platformer, Snake2D, Endless genre.
-

Education

- **Full Stack Game Development** - Outscal

[March 2025 – April 2026]

- **Bsc.Game Design & Development** - IIFA Lancaster Degree College

[July 2021 – Sept 2024]

- **PU** – ASC INDEPENDENT PU COLLEGE

[June 2019 – May 2021]

- **High School** – Atreya Vidyaniketan

[March 2019]
